## SAFETY PLAN OVERVIEW

Mr. Barron 715-247-3355 ext. 142 [mbarron@somerset.k12.wi.us](mailto:mbarron@somerset.k12.wi.us)

Permission has been granted by all the following manufactures to use there information and product manuals in my safety plan.

The only purpose of this is to aid my students in my woodworking classes, access to the plan from the Somerset High School website.

The list consists of the power tools and equipment that is used in my program.

- When you are using the safety manuals you may have to right click on your mouse and rotate the document so you can use it.

The following is a quote from the representative of the FREUD TOOLS

“Make sure your students understand that they should always read the manual that comes with any tool. They will learn how to be safe and will learn things that can make using the tool easier. If they ever complain that they do not have time then you can use what I tell woodworkers all the time... When you are sitting in the ER wondering if you will keep that eye or ever be able to use that hand again those few moments saved are going to seem pretty silly.”

Good luck and we appreciate what you Tech Ed teachers do.

Jim

The following is information from the Proxxon World and link to there site which provides additional information and training videos. Thanks

Hi Mark,

[It's perfectly OK to use the manual on your home page of the School's website.](#)

Please would you also provide some links there, to any associated pages of our website, such as

[https://www.proxxonworld.com.au/product/delta\\_sander\\_oz\\_i\\_115\\_e\\_110-120v](https://www.proxxonworld.com.au/product/delta_sander_oz_i_115_e_110-120v)

Thank you for choosing the Proxxon product for the workshop.

There are some nice videos available via our front page, too. Sure, some have German soundtrack, but there are many with English soundtrack. We have loaded those onto YouTube for wide availability and you may want to check through for any interesting material there. Of course, those are now public domain for linking and usage.

Regards,

Mark Bingham

CTO

**Proxxon World**

Mr. Barron: “Please: Safety is no accident it is the responsibility of all of us..... Be responsible and respectful of all the tools equipment and fellow woodworkers. Have fun be safe----- Now let *Rock N Roll* and create beautiful things that will last past your lifetime.”

## Have fun and “Be Safe”

### Somerset High School Woodshop Tools & Equipment Safety Test and Instruction Plan

November 12, 2009 Mr. Barron
